

How do I get started?

- Go to studyledge.com/app or download the Study Edge app from your mobile device's app store.
- Select "I attend a different college/university". Enter your school and select your subject area from the drop down menu.
- Change your subject, watch short concept videos, download accompanying study guides, and complete practice problems with video explanations.
- When it asks you to purchase full access, there is no credit card required! Simply enter the code **phimu2018** to redeem your free membership.

The screenshot shows the Study Edge website interface. On the left is a dark navigation menu with the following items: Videos & More, Buy Now / Pricing, Services, About Us, Parents & Professors, My Account, Help/FAQ, Contact Us, Collapse menu, Private Tutoring, and Log Out. The main content area features a 'Chemistry' dropdown menu with a green arrow pointing to it and a 'Change Subject' link. Below this is a video player for 'Topic 2: Composition of Matter' showing a flowchart of matter classification: Matter branches into Heterogeneous Mixture and Homogeneous. Homogeneous further branches into Pure Substance and Homogeneous Mixture (Solutions). Pure Substance branches into Element and Compound. The video player includes a progress bar and a 'Collapse All Folders' link. Below the video is a list of sections: Section 1: Introduction to Chemistry, which includes a study guide and two topics: Topic 1: Matter Properties (FREE) and Topic 2: Composition of Matter (checked). Each topic has 'WATCH VIDEO' and 'DOWNLOAD STUDY GUIDE' buttons.

Study Edge - a tool to save time and improve your grades:

- Study Edge breaks down complex topics into simple videos and study guides so you can be more prepared for your exams with less stress.
- Study Edge is a great supplement to your course, with videos that explain each topic in an engaging and easily understandable way.
- With video content, reviews, and more on the Study Edge mobile app, you'll feel like you have access to a virtual tutor anytime, anywhere.
