

**STUDY  
EDGE**

**Study smarter,  
not harder.**

## What is Study Edge?

Study Edge provides engaging, straight-to-the-point video content, practice problems and helpful accompanying PDF study guides for college courses, all delivered through web and mobile apps. Study Edge resources are a highly effective strategy to support your students with historically challenging material. Our content is aligned with some of the most commonly used textbooks, including OpenStax books.

An engaging “Study Expert” will walk your students through the concepts, as if they have a private tutor in their own home. A recent study in the International Journal of Human-Computer Interaction showed that Study Edge videos are proven to increase retention of material through increased engagement, instructor presence, and eye contact.

# What makes Study Edge different?

We are dedicated to providing superior educational services to high school and college students at an affordable price.

We are focused on a continuous learning model, as opposed to encouraging cram sessions a few days before an exam. This method better serves students and ultimately assists them in truly mastering class content. Study Edge offers services for many historically difficult courses. Across the country, these commonly include chemistry, economics, mathematics, statistics, and physics, just to name a few.

Study Edge can be used by college learning centers in conjunction with or as a digital substitute for **Supplemental Instruction (SI)**. If your institution would be interested in participating in our SI pilot program, please email [support@studyledge.com](mailto:support@studyledge.com) and let us know!

# How much does Study Edge cost?

Individual students can purchase access to the Study Edge app and its library of videos and study guides for a monthly fee that covers all their classes. Bulk memberships for 100 students or more can be purchased by educational institutions and learning centers at a discount. Just send us an email at [support@studyledge.com](mailto:support@studyledge.com) to discuss your institution's needs.
